3 Horizon Projekte im Vergleich

MATchUP – H2020 SMART CITIES & COMMUNITIES

MATchUP = Maximizing the Upscaling and replication potential of high level urban transformation strategies

Coordinated by the City of Valencia,

This project has received funding from the EU's Horizon 2020 research and innovation programme under grant agreement No. 774477.

3 Horizon Projekte im Vergleich

MATchUP – H2020 SMART CITIES & COMMUNITIES

MATchUP OBJECTIVES

Planning of sustainable urban transformation to get rid of old and inefficient technologies to seize new efficient solutions in the energy, mobility and ICT fields

Effective replication and upscaling of smart city solutions by ensuring the convergence of the demand and supply sides

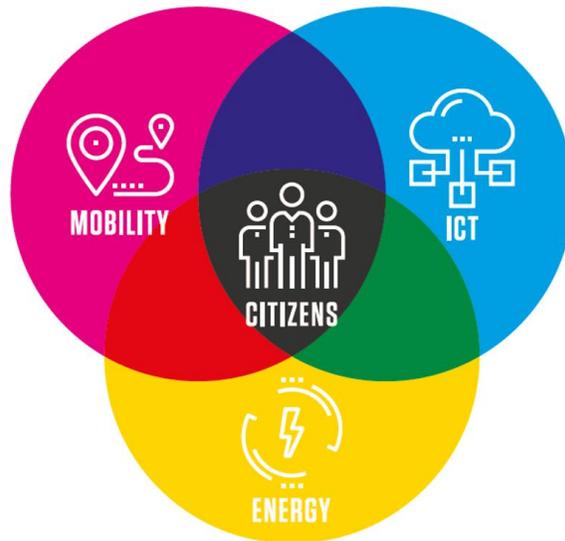

Implementation of these upscaling and replication plans to successfully reshape and repaint cities and their communities

3 Horizon Projekte im Vergleich

MATchUP – H2020 SMART CITIES & COMMUNITIES

ENERGY

LESS ENERGY, MORE SOLUTIONS

MATchUP aims to achieve high-performance districts through a series of interventions:

- improvements in buildings' energy efficiency,
- high integration of renewables in the energy supply,
- implementation of advanced energy management systems combined with innovative storage systems.

Moreover, an advanced management of the urban energy infrastructures will be set up, integrating innovative storage technologies to increase the global performance and RES contribution. Several innovative management systems will be deployed, from smart meters to overall recharging management solutions to reduce the grid impact.

MOBIILITY

SMART SOLUTIONS, BETTER MOBILITY

New electromobility solutions, both for persons and goods, will be implemented in MATchUP through new electric vehicles (EV) and charging infrastructures.

The most relevant actions that MATchUP will implement in this area are:

- conventional vehicles replacement: more than 150 EV will be introduced,
- implementation of around 120 innovative charging infrastructures for e-vehicles and e-buses,
- improved logistic solutions, like last mile logistics based on e-Bikes, and
- multimodality strategies.

ICT

CONNECTED CITIES, LIVEABLE LIVES

MATchUP will develop ICT solutions for improved planning management, control and maintenance of physical urban infrastructures and operational technologies in buildings, energy and transport, to enable better services for individuals and businesses.

An Open Specifications ICT concept will be established, defining a common approach in all functional requirements, software architecture and data structures to be designed and implemented.

Following this open specification concept, the current existing ICT models present in the cities will be improved with ICT solutions fully integrating at urban level to complement the demonstration.

CITIZENS

SMART CITIES, CITIZENS' CITIES

MATchUP wants to redesign cities by complementing the technical solutions with a set of non-technical ones, such as specific social engagement activities, sustainable employment initiatives, staff exchange, city mentoring, and validation of innovative business models.

Different key actors – policy makers, universities, industry, investors and, most importantly, citizens – will join forces to develop smart models of innovation, inclusion and prosperity to restore cities' liveability.

MATchUP aims to strengthen the city transformation strategies in a sustainable and inclusive manner, empowering citizens to participate in the planning process and integrating their voice in the replication and scale up plans.

This project has received funding from the EU's Horizon 2020 research and innovation programme under grant agreement No. 774477.

SMAGRINET Concept

Stakeholder list distribution according to countries

Distribution of the entities

This project has received funding from the EU's Horizon 2020 research and innovation programme under grant agreement No 837626

SMAGRINET main outputs:

- **Competence hub** for collaboration and networking
- Needs, capacities and resource base mapping
- **Case-based modules** that are integrated to the curricula of the universities will be developed for the master students (MA, MSc or ME)
- **Blended Learning programmes** (for upskilling and reskilling)

Key Facts:

- Online Courses for Studenten, Experts and Public
- Evaluation and Replication
- with 9 partners from 6 different countries

3 Horizon Projekte im Vergleich

Was hat mehr Arbeit und Anstrengung gekostet als gedacht?
Antragstellung Projektverlauf

Antragstellung

Schreibarbeit

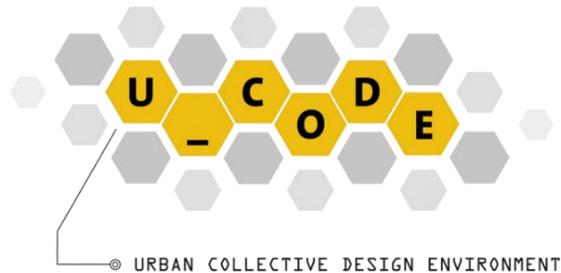

Projektverlauf

- Gemeinsames Aligement und Sprache finden
- Technisches Konzept und Umsetzung
- Sehr viele Partner,
- Übersicht über die eigenen Verantwortlichkeiten erlangen
- Diskrepanz zwischen EU, Wissenschaft und Verwaltung
- Gemeinsames Zielumsetzungsdefinition
- Module aufsetzen und in die Lehre implementieren
- Zuarbeiten und Zuständigkeiten

3 Horizon Projekte im Vergleich

Was gilt es in der Nachbereitung zu beachten?

RIA
2014-2015
02/2016 –
07/20219
TUD KA Koordinator

- Audit und finale Berichterstattung
- Final Review Meeting und Laufzeit der Arbeitsverträge

3 Horizon Projekte im Vergleich

Generelle Tipps / Hinweise für Antragssteller

- English is a must!
- Spaß an Austausch, Diskussion, Vergleich
- Seine Kernkompetenzen einbringen und das Projekt gemeinsam weiterentwickeln
- Offen bleiben – für agile Bedarfsanpassungen
- Die Kompetenzen für einen erfolgreichen Antrag sind nicht immer deckungsgleich mit den notwendigen Kompetenzen bei der Durchführung / Umsetzung

3 Horizon Projekte im Vergleich

Was war bei Horizont 2020 anders als bei Bundesförderprogrammen?

- Anwendungsorientiertheit
- Europäischer Austausch – Lösungen fokussieren nicht auf den Deutschen Markt
- Europa – kulturelle Unterschiede
- Langer Bearbeitungszeitraum
- Reisetätigkeiten
